

Order Ref: IOSHWS

INSTITUTE OF OCCUPATIONAL SAFETY AND HEALTH (IOSH) WORKING SAFELY CERTIFICATE

Duration: 1 Day In-house

Maximum delegates: 16

Working Safely: Introducing a completely new approach to health and safety training.

A one day course offering all the basics in a high impact interactive package with a presentation that's designed to be fun and get people fully involved and interested.

Working Safely course is designed to train employees to ensure that their actions contribute to health and safety in the workplace and that they clearly understand their individual responsibilities.

Aims

Working Safely is for people at any level, in any sector, needing a grounding in the essentials of health and safety. Everyone at work should have an understanding of why they must 'work safely' and this course offers exactly that.

Delegates who successfully complete the written and practical assessments can choose between IOSH's Working Safely certificate or a credit card sized 'passport' card.

Objectives

Working Safely will tell delegates what they need to know in a refreshingly informal way. Working Safely is not supposed to turn delegates into safety experts, it focuses on why health and safety is important, and how individuals can make a real difference to the wellbeing of themselves and others through changing their behaviour.

Working Safely covers the following areas:

- **Introducing working safely**
- **Defining hazard and risk**
- **Identifying common hazards**
- **Improving safety performance**
- **Protecting our environment**

Assessments

A written and practical assessment is built into the day's training so there is no need for follow-on tests on separate days, taking up valuable work time.

This qualification is recognised by the Health and Safety Executive (HSE) as a basic health and safety qualification.
